

BIO CUBE™

HIGH FRAGRANCE BIO-ENZYME CLEANER & DEODORISER

Breakthrough bio-enzyme urinal technology with potent fragrance system. Bio Cube™ now blocks stronger smelling than most urinal mats, longer lasting with Ultra High Compression Technology. Proven to remove odours, maintain, clean & deodorise urinals, traps & pipes.

GREEN CLEANING TECHNOLOGY

Recent breakthroughs in science & technology have helped us to understand how by using the correct good or beneficial bacteria virtually any dirt build up, stain, odour, septic system, FOG's (fats, oils, greases) or even hydrocarbon based oil stains can be safely cleaned, bio-degraded & removed quicker & more cost effectively than traditional harmful chemicals. The bacteria in Bio Cube™ is extremely intelligent. They determine what type of organic problem they are being applied to, & then selectively produce the right combination of enzymes to effectively biodegrade their intended target. The process is similar to how your stomach automatically knows how to break down different food types, only our products are exponentially more powerful. The incredible thing is that once the target has effectively been neutralized, the only by-products of this process are water & carbon dioxide!

Long after traditional harsh chemicals have stopped working, the bacteria & enzymes in Bio Cube™ keep tirelessly soldiering away on a microscopic level for many hours, days or even weeks later, depending on application. As long as there is a food source, the good bacteria in our Bio Cube™ keeps on reproducing at an exponential rate & biodegrading per their application as intended. The more the product is applied, the more robust & efficient the colony becomes. Not only are BioClean products completely eco-friendly, bio- degradable & safe to use, they are produced sustainably & responsibly in small laboratories, where their equivalent chemical counterparts require massive large scale environment polluting factories, or extensive land swallowing plantations.

PRODUCT DESCRIPTION

Bio Cube™ has been specially designed to clean & reduce odour problems, being environmentally friendly when compared to conventional chemical & or PDB Bio Cubes. Each biological block contains powerful biological cleaning agents, which are proven to maintain, clean, deodorise urinals as well as the traps and pipes.

PRODUCT FEATURES

- Removes the cause of odours
- Suitable for most types of urinals / troughs
- Prevents blocked traps & pipes
- Contains non-pathogenic microorganisms
- Contains a pleasant fragrance that aids in neutralizing odours
- Cleans the urinal & freshens the toilet cubicle
- Nontoxic & harmless to the environment
- Non irritant

CHARACTERISTICS

Consortium of Natural Bacteria
Appearance: Solid block
Colour: Blue
Odour: Citrus
Total CFU count: 8 x 10⁷
Weight: 40g/block

RECOMMENDED APPLICATIONS

Bio Cube™ is suitable for use in most types of urinals, stainless steel, porcelain, & ceramic troughs. Bacterial enzyme blocks should be used in washrooms with a history of odour problems, cleaning or pipe & u-trap problems.

PACKAGING/ SHELL LIFE/ STORAGE

Store in a cool, dry place. Avoid excessive inhalation. Wash hands thoroughly after handling. Available - by units 40g each
