

SEPTIC CLEANER™

DRAIN LINES & SEPTIC SYSTEMS ECO TREATMENT

Potent enzyme producing bacterial treatment for septic tanks, septic systems, & drain lines which digests solid waste, reduces odours, & keeps systems flowing naturally

GREEN ENZYME TECHNOLOGY

Billions of years ago Mother Nature had already solved the problem of how to keep the Earth clean, naturally. Recent breakthroughs in science and technology have helped us to understand how this is made possible. By using the correct good or beneficial bacteria virtually any dirt build up, stain, odour, septic system, FOG's (fats, oils, greases) or even hydrocarbon based oil stains can be safely cleaned, bio-degraded & removed quicker & more cost effectively than traditional harmful chemicals. Bioclean Septic Cleaner™ bacterial cultures are uniquely cultivated from South African soils naturally giving them a massive home ground performance advantage. The bacteria, microbes & enzymes in Septic Cleaner™ treatment metabolize much faster, reproduce quicker & survive for longer periods.

PRODUCT DESCRIPTION

Drain lines & septic systems are especially susceptible to the rapid build ups of fats, oils & greases (FOG's) & the huge & expensive problems they cause, with systems eventually completely blocking up.

Bioclean Septic Cleaner™ treatment is a special & proprietary blend of aerobic & facultative anaerobic bacteria which rapidly produce a wide variety of enzymes to rapidly degrade waste, & quickly & easily solve these plumbing & septic build up challenges. The treatment contains unique enzyme producing bacteria microorganisms which don't just emulsify the waste but actually feed on & totally eliminate it, with the resultant by-products being carbon dioxide & water! Septic Cleaner™ is totally safe & is nature's way of treating, digesting organic waste, eliminating odour & removing organic build-up from pipes, tanks, leach drains, septic tanks & septic systems.

HIGH COSTS ELIMINATED

An incorrectly functioning septic system can become very costly affair. With the increased prevalence of bleaches, biocides & anti-bacterial agents in many of today's consumer products, the naturally occurring bacteria, microbes & enzymes are easily killed off in septic systems & the natural balance is destroyed. Where traditional enzyme & bacterial products are obliterated, Septic Cleaner™ powder is incredibly engineered to be naturally tolerant of harsh chemicals & detergents. Regular dosing with Septic Cleaner™ is extremely cost effective & eliminates the need for expensive plumbing companies, honey suckers & waste companies, not to mention dangerous chemicals & the

harm they cause the environment. Regular proactive maintenance dosing with Septic Cleaner™ powder costs a fraction of traditional reactive methods & is an essential maintenance item.

SEWER OVERFLOWS & SPILLS

When sewer drain lines get blocked, raw sewerage spills out into suburbs & townships & causes a massive potential health hazard which needs to be immediately treated to contain possible cholera and typhoid outbreaks. Sewer Cleaner™ powder can simply be sprinkled over sewerage spills to contain the problem, while immediately helping to contain odours. Bad pathogens are controlled through a scientific process known as Competitive Exclusion. Sewer lines are nearly always caused by Fat, Oil & Grease blockages (F.O.G.'s) & Sewer Cleaner™ is ideal to be shock dosed into the affected sewer lines to biodegrade the cause of the problem quickly & effectively.

ADVANTAGES

- Eliminates foul odours
- Bioremediates & digests waste
- Naturally restores system health
- Keep drain & septic lines flowing freely
- Treat sewer spills & overflows
- Massive cost savings over physical & chemical methods
- Simple to dose, easy to maintain
- Reduces pathogenic disease causing organisms

SEPTIC CLEANER™

DRAIN LINES & SEPTIC SYSTEMS ECO TREATMENT

Septic Gobbler™

APPLICATION

Application:

Simply add to 2L - 5L of warm water & pour down basins, showers & baths or flush down toilets. Alternate the outlet every time for a multiple treatment effect. Dose after hours or at night.

Maintenance Dose: 250gm of Septic Cleaner™ per 5000 Litres of effluent monthly.

Shock Dose: Dose up to 5 times the recommended Maintenance Dose. Repeat weekly if necessary until results are achieved.

FOR BEST RESULTS, USE WITH:

- Bio Multiclean™ bio-enzyme all-purpose scented cleaning liquid which increases septic function
- Bio Flush™ bio-enzyme toilet treatment which helps septic systems & saves water
- Oxy-Clean™ eco-friendly bleach replacement which is septic safe
- Bio Dish Hand™ cost effective high performance bio-enzyme dishwashing liquid which aids enzyme septic system performance

PACKAGING/ SHELL LIFE/ STORAGE

Stable for 12 months at ambient temperature, out of direct sunlight. Available in 1Kg - 5Kg - 20Kg bags.
